

The Guide to the Hostel Laundry Tracker!

Here is everything you need to know to get your clothes washed without the headache using **Hostel Laundry Tracker**.

1. Getting Started

1. **Open the App:** Head to the app link on your phone or laptop.
 2. **Select Your Hostel:** On the main Page (Dashboard) pick either **Kritika** or **Rohini** Hostel. After selecting your hostel all machines in your hostel and their status will be shown.
 3. **Turn on Notifications:** If your browser asks for permission to send notifications, **allow it!** The app will ping you when your laundry is done or when a machine frees up.
-

2. Starting a Machine

If a machine shows up as  **AVAILABLE**, it's all yours!

1. Tap the **Start Machine** button.
 2. Fill in your **Name**, **Designation**, and how long your cycle will take (**Duration**).
 3. Create a **PIN**. *Remember this PIN!* It acts as your personal password so nobody else can mess with your timer.
 4. Tap **Start**. The machine will turn red ( **BUSY**) so everyone else knows it's taken.
-

3. Joining the Queue (No more fighting for next!)

Is the machine you want already running ( **BUSY**)? No problem, just get in line virtually!

1. Tap the **Join Queue** button under the busy machine.
2. Fill in your Name and a PIN.
3. You can even mark your laundry as  **Urgent** (and give a reason) if you have an absolute emergency. This will make another input box appear in which you can enter your emergency reason to be seen by all.

4. Once the person before you finishes, the app will reserve the machine for you! **You have 10 minutes to claim it.** If you don't start the machine within 10 minutes, you will be automatically kicked out of the queue so others can use it.
-

4. Finishing Early or Adding Time

Did your clothes wash faster than expected? Or do you need an extra 15 minutes because of powercut or because the machine timer isn't in synchronization with the one in app?

1. Tap the  **Finish early / Extend time** dropdown under your active machine.
 2. Enter the **PIN** you created when you started the machine.
 3. Tap **Finish Early** to instantly free up the machine for the next person, OR tap **Add Time** to extend your timer.
-

A Few Extra Cool Things

- **Telegram Updates:** The app is hooked up to Telegram! Major events (like someone joining a queue or a machine freeing up) will be broadcasted so you can stay in the loop.
- **Announcements:** Keep an eye on the top of the dashboard. If the washing machines are under maintenance, the admin will post an announcement there.
- **Usage Logs:** Curious who does laundry at 3 AM? You can check the "Usage Logs" in the sidebar menu to see the history of the machines.
- **User Manual:** Need a refresher on how to use the app? You can always access this guide by clicking "User Manual" in the sidebar menu!

Be kind, respect the queue, and happy washing! 

Note

The app timer doesn't ensure that the physical machine timer will be in perfect synchronization. The washing machine timers work differently and it's possible that your cycle may finish on the app but not on the machine. In that case, please add time to the app (refer to point 4).
